

Key headline asks for future land management support in Wales

24th November 2016

Set out below are six key asks calling for a future land management system in Wales that applies the principles enshrined in Welsh law to all forms of land management. As we transition out of the EU, we must move towards new policies and payment systems that enable Wales to fully implement these principles in order to support a biodiverse natural environment with healthy functioning ecosystems.

1. The Welsh Government must be able to set land management support in context of its own legislation – the Well-being of Future Generations Act and the Environment (Wales) Act - and provide a place-based approach through the National Natural Resource Policy and Area statements.
2. We want to see environmental standards that are stronger than they are now, and the Welsh Government calling on the UK Government to provide strong leadership on environmental standards at an international level.
3. There should be a financial settlement for Wales to enable the full delivery of environmental objectives. A settlement based on the Barnett formula would result in less funding than currently comes to Wales and consequently would be an insufficient allocation of funds to enable the transition to a sustainable future for the Welsh environment.
4. Pillar 1 payments are unsustainable and should not be taken forward into future support mechanisms. In the context of Welsh legislation, public money should only be made available for delivery of public benefits. There should be an end of support to farming and forestry that externalises costs as this compromises Wales' ability to deliver sustainable management of natural resources and invest in restoration of ecological resilience to deliver the greatest public benefit.
5. Build a robust and well-resourced enforcement system based on high minimum standards.
6. Alongside delivery of public benefit, there should be a move to developing new and innovative supply chains for existing and new quality sustainable products. This will require upskilling of land managers to encourage innovation.

Wales Environment Link (WEL) is a network of environmental, countryside and heritage Non-Governmental Organisations in Wales, most of whom have an all-Wales remit. WEL is officially designated the intermediary body between the government and the environmental NGO sector in

Wales. Our vision is a healthy, sustainably managed environment and countryside with safeguarded heritage in which the people of Wales and future generations can prosper.

This paper represents the consensus view of a group of WEL members working in this specialist area. Members may also produce information individually in order to raise more detailed issues that are important to their particular organisation.
